

## EDUCATION

Lambda School 2019 to Current

## SUMMARY

I have a passion for code, I love to learn, and would consider myself to be a problem solver enthusiast! I believe that learning is a lifelong journey and I wake up everyday ready to learn new things. I love working in a group, but also can work very well on my own. I promote a growth mindset and encourage others around me to learn new things. It's important for me to create an environment where others can flourish.

## SKILLS

**COMPUTER LITERACY:** Node, React, Redux, Web Development, Python, HTML, CSS, JavaScript, Debugging, Typing, Visual Studio Code, Git, Github, Netlify, Heroku, Zeit, Postman, Research, APIs, Algorithms, Data Structures, Deployment, SQL, SQLiteStudio, REST, Security, Jest, Unit Testing, Cypress, Slack, OOP

## EMPLOYMENT

LAMBDA SCHOOL  
Section Lead

May 2020 to Current

Contract Position

- Manage approximately 100 students representing ~\$3 million in student investment for Lambda School.
- Lead daily standup meetings with 8 Team Leads to build camaraderie, progress, share ideas, and provide guidance on the week's study material.
- Collaborate with instructors to organize the learning environment and ensure student growth is occurring.

LAMBDA SCHOOL  
Team Lead

Feb. 2020 to May 2020

Contract Position

- Mentored eight students on how to learn effectively and solve programming problems.
- Delivered one-on-one code reviews and feedback on a daily basis.
- Provided technical and emotional support to students.
- Facilitated daily standup meetings and live group debugging sessions.
- Created video tutorials to help aid students in areas they were struggling with.

ALTER IMAGE HAIR SALON  
Shampoo Tech.

Westminster, MD  
2016 to Current

- Collaborate on a team to assist customers with any service related issues.
- Effectively communicate with customers to better suit their needs.
- Train new hires on general customer service tasks.
- Manage a multi-line phone and schedule appointments.

## PROJECTS

CHEF PORTFOLIO

Jan. 2020 to Jan. 2020

A web application where chefs can store and share their most famous recipes with users. Chefs also have the ability to create, store, edit, and delete their recipes.

- Developed remotely with a team of 5 Web Developers.
- Individually responsible for creating react components and managing state throughout the application.
- Utilized Axios, JavaScript, React, and Node to create a fully functional web application where you can go to find or store your favorite recipes.

SECRET FAMILY RECIPES

Feb. 2020 to Feb. 2020

A web application that has the ability to create, store, edit, and delete recipes. This app helps users to be able to store all their family recipes so that they do not get lost or ruined over time.

- Worked with a remote team of 5 Web Developers to create a full web app in a weeks time.
- Independently responsible for creating a node backend that has functionality to create, edit, and delete recipes.
- Implemented tools such as React, JavaScript, Node, and Jest to develop and test a fully functional web application that stores family recipes for users convenience.

SAVERLIFE

Aug. 2020 to Current

An innovative web application that tracks transactions and predicts budgets for those interested in improving their financial wellbeing. This app truly takes the work out of budgeting.

- Collaborating remotely with a team of 6 Developers. Consisting of 4 Web Developers, and 2 Data Scientists.
- Solely responsible for creating CRUD operations for creating, reading, updating, and deleting a contribution to a users overall savings goal.
- Creating a customized profile page for each user with one other teammate.
- Utilizing multiple tools such as React, Postgres, and Styled Components to build a fully functional web application that takes a user's past financial data and creates a predicted budget.
