Skills

JavaScript, TypeScript, React, Node.js, Redux, GraphQL, Express, Python, Django, Angular, AWS, HTML, CSS, PostgreSQL, MongoDB, Docker, Webpack, Rollup, NPM, Git

Work Experience

Software Developer

CPM Educational Program - Remote

April 2020 to Present

- Developed a shared component library using TypeScript and React to allow teacher-student interactions through a virtual whiteboard and text editor with an integrated virtual math keyboard.
- Expanded flagship product using TypeScript, React, Node.js, Redux and Express to allow students to submit their assignments and review teacher feedback.
- Created an application using TypeScript, React and Redux for teachers to manage and assess student submitted assignments.

Frontend Consultant

Capco - Orlando, FL

February 2020 to August 2020

- Implemented functional and interactive frontend features using TypeScript and Angular to assist in opening business banking accounts.
- Collaborated with product, design, QA, and other engineering teams utilizing an Agile workflow, resulting in completion of project ahead of time.

Software Engineer

Back Office - West Palm Beach, FL

July 2019 to February 2020

- Automated the retrieval and processing of financial transactions and documents from multiple sources using React, Node.js, Redux, GraphQL, Express and AWS, reducing client onboarding time from days to minutes.
- Deployed, configured and maintained multiple applications across AWS products including S3, CloudFront, EC2 and RDS.

Education

Full Stack Web Development

Lambda School - Remote

July 2018 to July 2019
