Projects

04/2020 – 06/2020

SoMe (Social Media Strategy), *Team Lead* ⬈
- Led a team of 3 data scientists and 4 web developers through full product development lifecycle over 8-week project unit, including product releases, debugging, code reviews, and stakeholder meetings
- Collaborated with web team members to integrate Okta, refactor codebase, write unit tests and fix bugs

05/2020

Game of Life, *Solo Developer* ⬈
- Wrote an algorithm that examines the state of each cell's neighbors and applies mathematical rules to update the cell's state
- Implemented three sample cell configurations that users can load and run
- Enabled a feature to adjust the speed of the simulation

Professional Experience

01/2020 – 07/2020
Remote

Labs Team Lead, *Lambda School*
- Led daily standup meetings with a cross functional team of 3 data scientists and 4 web developers to facilitate the sharing of ideas and work progress
- Tracked student attendance, graded evaluation projects and completed student progress reports

03/2018 – 01/2020
Everett

Learning Ambassador, *Amazon Logistics*
- Supported new hires and current associates by providing constructive feedback, reinforcing positive behavior, and ensuring associates work safely and in accordance with standard operating procedures
- Provided continuous feedback to management to help ensure Amazon's safety, quality and performance expectations
- Problem solved package issues with internal Amazon software to meet customer expectations while minimizing company losses (eg. duplicate deliveries)

Education

04/2019 – 08/2020
Remote

Full Stack Web Development & Computer Science, *Lambda School*

Volunteer Experience

08/2020

Virufy, *Web Developer*
- Constructed a static page website from scratch based on Figma UI mockups
- Optimized the website for fast load times and accessibility
- Initialized cookie script to ensure the website meets legal GDPR/LGPD requirements
